# HIGH SECURITY. RUGGED DURABILITY.

## Titan™ Electronic Safe Lock

Model 2006/2007

Designed with advanced features to maximize performance while minimizing the wear and tear of daily use, the Sargent and Greenleaf Titan™ Electronic Safe Lock provides reliable security for banking and commercial assets.

### Features

- **Proven Security:** The Titan™ lock is a robust, 10-user lock with a completely redesigned locking mechanism based on the proven security of a motorized blocking device.
- **Rugged Design:** Built to withstand heavy use, even with additional boltwork or locking bars, Titan™ performs with exceptional durability. A motor-driven locking mechanism delivers an extra measure of security and longer battery life.
- **Best-In-Class Warranty:** Sargent and Greenleaf backs Titan™ Locks with a leading two-year warranty and exceptional service.

Titan™

Protecting assets from high-security government sites to banks to businesses for more than 160 years, S&G continues to set the standard for innovation, security, quality, and trust.

### Titan™ benefits:

- > Three modes of operation: single user, dual control, manager/employee
- > Ten codes: programmer, master, user
- > Management reset code when in single control mode
- > Time delay override code
- > EMP-resistant
- > Quick, easy installation
- > Penalty lockout

## Built to withstand heavy use.

Titan™ performs with exceptional durability and the motor-driven locking mechanism delivers an extra measure of security. Titan™ is tested to the highest EMP impact standard. Regardless of attack or conditions, our EMP-resistant electronic gun safe lock keeps your assets secure.

### Model 2006 Pivot Bolt

- Automatically re-locks to secure the safe whenever the container's boltwork moves to the fully closed position
- Lock bolt retraction and extension is controlled by the movement of the safe's boltwork
- Withstands 225 lbs. of bolt end pressure for a high level of security in boltwork blocking applications
- Stainless steel lock bolt

### Model 2007 Direct Drive

- Lock bolt retraction and extension is controlled by turning of the keypad ring, offering dependable manual control of the locking bolt
- Exclusive no-twist cable design prevents cable damage during opening
- Withstands 225 lbs. of bolt end pressure for a high level of security
